Third-year Computer Science student specializing in Artificial Intelligence (AI) and Data Science. Possesses a solid foundation in software engineering, machine learning algorithms, and predictive data analytics. Experienced in building analytical models, processing large-scale datasets, and translating complex data into actionable, intelligent solutions. Eager to contribute to innovative, data-driven projects while further expanding technical expertise in the tech industry.

EDUCATION

BINUS University — **Jakarta**
Bachelor's degree in Computer Science, Minor in Intelligent Systems — *Aug 2024 – Aug 2028 (Expected)*
GPA: 3.52/4.00

- **Relevant Coursework:** Algorithm and Programming, Data Structures, Calculus, Statistics, Linear Algebra, Discrete Math, Database Technology, Algorithm Design and Analysis, Machine Learning, Natural Language Processing, Computer Vision, Deep Learning

EXPERIENCE

BINUS Student Learning Community — **Jakarta**
IT Support — *Dec 2025 – Present*

- Designed the student organization's website in Figma, creating the layout and visual structure before development
- Managed the website's day-to-day flow, keeping its content and features organized and functioning
- Supported the organization's IT needs, helping the team publish and maintain information through the website

Data Science Club BINUS University — **Jakarta**
Human Capital — *Dec 2025 – Present*

- Managed the student member database, keeping member information organized and accessible for the division
- Used the database to organize birthday greetings, supporting member engagement and a sense of community in the club
- Collaborated within the Human Capital division to maintain accurate, up-to-date member records

AWARDS & COMPETITIONS

Rumpun Penalaran 2026 Data Science Competition (EVOLVE)
2nd Place — *Oct 2026*

- Fine-tuned open LLMs (Qwen2.5-7B, Qwen3-8B) with QLoRA on Kaggle GPUs to classify the sentiment of ESG-related restaurant reviews, reaching 0.837 macro F1 on the private leaderboard
- Compared TF-IDF baselines, DeBERTa and LLMs with 5-fold cross-validation, then combined three LLM runs and tuned class weights with nested cross-validation
- Turned the predictions into recommendations for restaurant owners and presented them to the judges in the final round

PROJECTS

Heart Disease Detection System Using SVM — **Jakarta**
Machine Learning Engineer — *Mar 2026 – Jun 2026*

- Built an SVM (RBF) classifier predicting heart disease from 11 clinical features (918 patients), reaching 0.95 ROC-AUC and 0.94 recall
- Benchmarked Logistic Regression, Random Forest and 3 SVM kernels with GridSearchCV, and picked the model with the fewest missed diagnoses
- Engineered preprocessing: median imputation with missing-value flags, one-hot encoding and feature scaling
- Built a Streamlit screening app with probability-based risk levels and a user-testing feedback survey

Face Recognition Attendance System — **Jakarta**
Developer & Tester — *Mar 2026 – Jun 2026*

- Contributed to a web-based attendance system that detects and recognizes faces from a webcam using the LBPH (Local Binary Patterns Histograms) algorithm
- Assisted in writing the Python scripts for the LBPH face recognition pipeline
- Tested the system to verify that recognition and attendance logging worked as intended

RiverGuard: Plastic Waste Detection & Alert System **Jakarta**
Machine Learning Engineer *Sep 2025 – Feb 2026*

- Fine-tuned a YOLO11s CNN to detect river plastic (0.83 mAP50), with real-time Telegram alerts when waste passes a threshold
- Rebuilt the prototype into a tested Python package with a Gradio web app and a CI/CD pipeline
- Built an evaluation framework that exposed a gap: 96% accuracy in-domain vs 29% on trash-carpeted rivers

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Pengabdian Kepada Masyarakat BSLC 2026 **Jakarta**
Design Division Committee *May 2026 – Jul 2026*

- Designed the event poster as the main visual for promoting the event
- Created Instagram feed designs in Canva to announce and promote event information on social media
- Documented the event, preserving the activities for the organization's records and future use

Study2Challenge BSLC 2026 **Jakarta**
Event Division Committee *Jun 2026 – Present*

- Prepared the media partner proposal, outlining the event's concept, benefits, and partnership offer to attract promotional support
- Arranged the technical meeting rundown, structuring the schedule and flow so the committee and participants knew each session's timing and responsibilities
- Assisted in the meetings, supporting coordination between committee members and helping sessions run smoothly in a remote setting

Career Preparation BSLC 2026 **Jakarta**
Publication Division Committee *May 2026 – Jul 2026*

- Contacted and coordinated with media partners to extend the event's publication reach to a wider audience
- Wrote the official event article, summarizing the event's purpose, activities, and key takeaways for publication
- Worked with the publication team to keep event communication consistent and ready for release

Welcoming Party BSLC 2026 **Jakarta**
Design Division Committee *Jun 2026 – Sep 2026*

- Designed an Instagram story template, giving the event's social media promotion a consistent, reusable visual format
- Created certificate designs in Canva for organizers and speakers, formally recognizing their contributions
- Worked within the committee's event theme to keep all design outputs visually aligned

LANGUAGES & SKILLS

- **Language:** Bahasa Indonesia (Native), English (Professional Working Proficiency)
- **Programming Languages:** Python, SQL, Java, C
- **Machine Learning & Data:** PyTorch, Ultralytics YOLO, OpenCV, Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn, Hugging Face Transformers, LLM Fine-tuning (QLoRA)
- **Tools & Deployment:** Git, GitHub, GitHub Actions, pytest, Streamlit, Gradio, Kaggle, Google Colab, Roboflow, Figma, Canva
- **Soft Skills:** Teamwork, Communication, Event Coordination, Graphic Design, Technical Writing, Problem Solving
